JOURNAL OF MARINE SYSTEMS

Contents Volume 8, 1996

Research Papers

Modelling mixed layer depth and plankton biomass off the west coast of South Island, New Zealand
M.G. Hadfield and J. Sharples 1

Radiolarian assemblages in the eastern tropical Atlantic: patterns in the plankton and in sediment trap samples
D. Boltovskoy, H. Oberhänsli and G. Wefer 31

Selected aspects of the physical oceanography and particle fluxes in fjords of northern Norway
P. Wassmann, H. Svendsen, A. Keck and M. Reigstad 53

Monitoring of the Gulf Stream path using Geosat and Topex/Poseidon altimetric data assimilated into a model of ocean circulation
E. Blayo, J. Verron, J.M. Molines and L. Testard 73

Distribution of suspended matter in a coastal upwelling area. Satellite data and in situ measurements
J.-M. Froidefond, P. Castaing and J.-M. Jouanneau 91

On the numerical treatment of a lateral boundary layer in a shallow sea model
E. Deleersnijder 107

On horizontal and vertical transport of Ford water
A.I. Ginzburg, N.N. Golenko and V.T. Paka 119

Book Review

Atmosphere–Ocean Interaction, by E.B. Kraus and J.A. Businger — P. Buat-Ménard 131

Special Issue: JOINT NUMERICAL SEA MODELLING (JONSMOD '94)

Edited by P.P.G. Dyke

Preface iii

Uncertainties in modelling of tidal flows off Singapore Island
A.M. Riddle 133

On the residual advection of passive constituents
E.J.M. Delhez 147

An analytical and numerical study of surface and bottom boundary layers with variable forcing and application to the North Sea
P.J. Luyten 171

A numerical model of the long term flow along the Malin-Hebrides shelf
J. Xing and A.M. Davies 191

Model simulation of the Skagerrak circulation and hydrography during Skagex
E. Svendsen, J. Berntsen, M. Skogen, B. Ådlandsvik and E. Martinsen 219

Advection schemes for shelf sea models
I.D. James 237

Coupling of hydrodynamical transport and ecological models for 2D horizontal flow
H.J. Vested, J.W. Baretta, L.C. Ekebjærg and A. Labrosse 255
A two-layer model of the Rhine plume
J.M. de Kok 269
A fine-resolution 3D model of the Southern North Sea
R. Proctor and I.D. James 285
